Plant and Soil **176**: 333–335, 1995.

Contents Volume 176 (1995)

Research articles

Changes in radiocaesium uptake and distribution in wheat during plant development: a solution culture study 1–6
E. Smolders, G. Shaw

Autecology of *Bradyrhizobium japonicum* in soybean-rice rotations 7–14
R.J. Roughley, R.R. Gault, L.G Gemell, J.A. Andrews, J. Brockwell, B.W. Dunn, G.W. Griffiths, E.J. Hartley, D.M. Hebb, M.B. Peoples, J.A. Thompson

Growth and phosphorus supply of sugar beet as affected by soil compaction and water tension 15–25
C. Hoffmann, A. Jungk

Relationships between soil, fallow period, weeds and rice yield in slash-and-burn systems of Laos 27–36
W. Roder, S. Phengchanh, B. Keoboulapha

Elevated CO_2 and temperature effects on soil carbon and nitrogen cycling in ryegrass/white clover turves of an Endoaquept soil 37–49
D.J. Ross, K.R. Tate, P.C.D. Newton

Influence of rice cultivar on methane emission from paddy fields 51–56
A. Watanabe, M. Kajiwara, T. Tashiro, M. Kimura

Comparison of phosphatase localization in the intraradical hyphae of arbuscular mycorrhizal fungi, *Glomus* spp. and *Gigaspora* spp. 57–63
T. Ezawa, M. Saito, T. Yoshida

Isolation of tomato strains varying in potassium acquisition using a sand-zeolite culture system 65–70
J. Chen, W.H. Gabelman

Prediction of the non-fertilizer N supply of mineral grassland soils 71–79
J. Hassink

Soil nitrogen transformations and nitrate utilization by *Deschampsia flexuosa* (L.) Trin. at two contrasting heathland sites 81–93
S.R. Troelstra, R. Wagenaar, W. Smant, W. De Boer

White lupin utilizes soil phosphorus that is unavailable to soybean 95–100
S.M. Braum, P.A. Helmke

Response of "criollo" maize to single and mixed species inocula of arbuscular mycorrhizal fungi 101–105
M.E. Gavito, Lucía Varela

Interactions of elevated CO_2, NH_3 and O_3 on mycorrhizal infection, gas exchange and N metabolism in saplings of Scots pine 107–116
M. Pérez-Soba, T.A. Dueck, G. Puppi, P.J.C. Kuiper

Some effects of sodium application on the yield and chemical composition of pasture grown under differing conditions of potassium and moisture supply 117–127
A. Cushnahan, J.S. Bailey, F.J. Gordon

Quantitative assessment of the interaction between the antagonistic fungus *Talaromyces flavus* and the wilt pathogen *Verticillium dahliae* on eggplant roots 129–137
T. Fahima, Y. Henis

Spatial variability of throughfall chemistry and selected soil properties as influenced by stem distance in a mature Norway spruce (*Picea abies*, Karst.) stand 139–147
J. Seiler, E. Matzner

Manipulation of quality and mineralization of tropical legume tree prunings by varying nitrogen supply 149–160
E. Handayanto, G. Cadisch, K.E. Giller

The effect of phosphorus on nodule formation and function in the *Casuarina-Frankia* symbiosis 161–169
Y. Yang

Growth and nutrient dynamics of beech (*Fagus sylvatica* L.) seedlings in acid soils 171–181
M. Ljungström, I. Stjernquist

Short communication

Mycorrhizal dependency of banana (*Musa acuminata*, AAA group) cultivar 183–187
S. Declerck, C. Plenchette, D.G. Strullu

Research articles

Interaction of nitrate uptake and nitrogen fixation in faba beans 189–196
H. Kage

$CaCl_2$ extractable N fractions and K_2SO_4 extractable N released on fumigation as affected by green manure mineralization and soil texture 197–203
T. Appel, I. Sisak, M. Hermanns-Sellen

Rooting characteristics of lettuce grown in irrigated sand beds 205–217
D. Schwarz, M. Heinen, M. Van Noordwijk

Effects of calcium on growth and leaf ion concentrations of *Gossypium hirsutum* grown in saline hydroponic culture 219–227
J. Gorham, J. Bridges

The calcium nutrition of bambara groundnut (*Vigna subterranea* (L.) Verdc.) 229–234
M. van der Straten, W.G. Keltjens, A.C. Okoboi, E. Westphal

Cultivar and planting date effects on soybean root growth 235–241
P.C. Turman, W.J. Wiebold, J.A. Wrather, P.W. Tracy

Differential sensitivity of plant-associated bacteria to sulfonylurea and imidazolinone herbicides 243–253
G. Forlani, M. Mantelli, M. Branzoni, E. Nielsen, F. Favilli

Influence of radiata pine seedlings on chemical properties of some New Zealand montane grassland soils 255–262
M.R. Davis

Bulk soil pH and rhizosphere pH of peach trees in calcareous and alkaline soils as affected by the form of nitrogen fertilizers 263–271
M. Tagliavini, A. Masia, M. Quartieri

Activity of nitrifying populations in grassland soil polluted by polychlorinated biphenyls (PCBs) 273–282
L. Dušek

Effects of extracts of *Alnus glutinosa* seeds on growth of *Frankia* strain Arl3 under static and fermentor culture conditions 283–288
E. Ringø, E. Clausen, E. Løvaas, M. Van Ghelue, B. Solheim

Effect of long-term application of animal manure on physical properties of three soils 289–295
O.H. Darwish, N. Persaud, D.C. Martens

Reversibility of damages to forest floor plants by episodes of elevated hydrogen- and aluminium-ion concentrations in the soil solution 297–305
M.E. Quist

Wheat genotypes differ in Zn efficiency when grown in chelate-buffered nutrient solution. I. Growth 307–316
Z. Rengel, R.D. Graham

Wheat genotypes differ in Zn efficiency when grown in chelate-buffered nutrient solution. II. Nutrient uptake 317–324
Z. Rengel, R.D. Graham

Short communications

VA-mycorrhiza mediated P effect on growth and yield of sunflower (*Helianthus annuus* L.) at different P levels 325–328
C.P. Chandrashekara, V.C. Patil, M.N. Sreenivasa

Diagnosis of zinc deficiency in seedlings of a tropical eucalypt (*Eucalyptus urophylla* S. T. Blake) 329–332
B. Dell, X. Daping
